

501 Series – High Current 1206 Fast-Acting Fuse

Description

The 501 Series is a 100% Lead-free, RoHS compliant and Halogen-free fuse series designed specifically to provide over- current protection to circuits that operate under high working ambient temperature up to 150°C.

The general design ensures excellent temperature stability and performance reliability.

The high I²t values which is typical in the Littelfuse Ceramic Fuse family, ensure high inrush current withstand capability.

Features

- Operating Temperature from -55°C to +150°C
- 100% Lead-free, RoHS compliant and Halogenfree
- Designed to provide over-current protection in high current voltage regulator module (VRM) applications
- · Suitable for both leaded

RoHS M HF c W us St.

and lead-free reflow / wave soldering

Applications

- Voltage Regulator Module (VRM) Equipment
- Notebook PC
- DC-DC Converter

12	012.	32	150 A @ 32 VDC	0.00311	20.341	0.04927	0.5912	x	х
15	015.	32	100 A @ 32 VDC	0.00250	39.700	0.04843	0.7265	x	х
20	020.	32		0.00194	86.360	0.05888	1.1776	x	х

Notes:

2. Nominal Resistance measured with < 10% rated current.

3. Nominal Melting I²t measured at 1 msec. opening time. For other I²t data refer to chart. 4. Nominal Voltage Drop measured at rated current after temperature has stabilized and

with fuse mounted on board with 3-oz Cu trace.

Devices designed to carry rated current for 4 hours minimum. It is recommended that devices be operated continuously at no more than 80% rated current. See "Temperature Re-rating Curve" for additional re-rating information.

Devices designed to be mounted with marking code facing up.

Agency A	pprovals

۹.	29862	10A - 20A

Electrical Ch	aracteristics for S	eries
% of Ampere Rating	Ampere Rating	OpeningTime at 25°C
100%	10A – 20A	4 Hours, Minimum
350%	10A – 20A	5 Seconds, Maximum

^{1.} DC Interrupting Rating tested at rated voltage with time constant < 0.5 msec.

Surface Mount Fuses

Ceramic Fuse > 501 Series

Note:

1. Re-rating depicted in this curve is in addition to the standard re-rating of 20% for continuous operation.

Example:

For continuous operation at 75 degrees celsius, the fuse should be rerated as follows: $I = (0.80)(0.85)I_{RAT} = (0.68)I_{RAT}$
