TDK EMC Technology

TDK Flexield

Noise Suppression Sheets

Flexield® is an absorptive electromagnetic shielding material consisting of magnetic material and resin. It suppresses noise radiated from electronic equipment over a wide range of frequencies, offers flexibility in fabrication and delivers particularly excellent performance in high frequency ranges. Flexield® is the ideal sheet-type noise reduction product for mobile devices including notebook PCs, digital cameras and cell phones.

* All Product Conforming to RoHS Directive

*Features

devices.

and shapes.

•They are flexible(Will not crack). •They are suited for thin and compact

•Available in a wide range of dimensions

•The products in the line-up support a

wide range of frequency bands(10M-

* Applications 1

- •Electromagnetic noise reduction for electric equipment (especially for mobile equipment) Internal EMI, resonance reduction(mounting inside a shielded box)
 - RF-block Amplifier

Radiated noise reduction(Circuit, IC, flat cable)

Flexield

- Surface current suppression
- Improvement of noise immunity
- SAR reduction for mobile phone

Countermeasure1

• It may not be allowed to export these absorbers due to Export Control regulations.

*Basic characteristics

<u>The filter effect</u> Reduces the effects of high-frequency elements by adding impedance to signal lines

Common-mode electrical

<u>current reduction effect</u> Reduces the common-mode electrical current elements superposed in the flexible cables connecting high-speed circuits and the like. **Flexield**
