

Tpcm™ 900 is a high performance, non-electrically conductive phasechange material. At 50°C, Tpcm™ 900 begins to soften and flow, filling the microscopic irregularities of both the thermal solution and the component's surfaces, thereby reducing thermal resistance. It is a flexible solid at room temperature and freestanding without reinforcing components that reduce thermal performance.

Tpcm 900 shows no performance degradation after 1,000 hours @ 130°C, or after 500 cycles, from -25°C to 125°C. The material softens and does not fully change state, resulting in minimal migration (pump out) at operating temperatures (see viscosity curve). Supplied in rolls with top tabbed liners for easy manual or large volume automatic application. Individually die cut parts can also be supplied.

FEATURES AND BENEFITS

- 0.03°C-in²/watt thermal resistance
- Naturally tacky at room temperature, no adhesive required
- No heatsink preheating required
- Available in 3 thicknesses, 0.005", 0.010" and 0.020" (0.125 mm, 0.25 mm and 0.50 mm)

APPLICATIONS

- High frequency microprocessors
- Notebook and desktop PCs
- Computer servers
- DC/DC converts
- Memory modules
- Cache chips
- IGBTs

Standard Sheet Sizes: 9" x 9" (229 mm x 229 mm)

Tpcm™ 900 sheets are supplied with a white release paper and a bottom liner.

Tpcm™ 900 is available in rolls with an extended tab liner or individual die cut shapes.

Pressure Sensitive Adhesive: Pressure sensitive adhesive is not applicable for Tpcm™ products.

Reinforcement: No reinforcement is necessary.
