Lead-free Gree

## Description

The 74LVCH245A is an octal transceiver designed for asynchronous communication between data buses. The device transmits data from the $A$ bus to the $B$ bus or from the $B$ bus to the $A$ bus, depending on the logic level at the direction-control (DIR) input. The output-enable $(\overline{\mathrm{OE}})$ pin can be used to disable the device so the buses effectively are isolated.

The device is designed for operation with a power supply range of 1.65 V to 3.6 V .

The inputs are tolerant to 5.5 V allowing this device to be used in a mixed voltage environment. The device is fully specified for partial power down applications using loff. The loff circuitry disables the output preventing damaging current backflow when the device is powered down.

Bus hold circuitry holds unused or undriven inputs at a high or low logic state. The use of external pull-up or pull down resistors is not recommended.

## Features

- $\quad$ Supply Voltage Range from 1.65 V to 3.6 V
- Sinks or Sources 24 ma at $\mathrm{V}_{\mathrm{CC}}=3 \mathrm{~V}$
- CMOS Low Power Consumption
- Ioff Supports Partial Power Down Operation
- Inputs or Outputs Accept Up to 5.5V
- Inputs Can Be Driven by 3.3V or 5V Allowing for Mixed Voltage Applications
- Schmitt Trigger Action at All Inputs
- Typical $V_{\text {olp }}$ (Quiet Output Ground Bounce) Less Than 0.8V with $\mathrm{V}_{\mathrm{CC}}=3.3 \mathrm{~V}$ and $\mathrm{T}_{\mathrm{A}}=+25^{\circ} \mathrm{C}$
- Typical $\mathrm{V}_{\mathrm{OHV}}$ (Quiet Output dynamic VOH ) Greater than 2.0 V with $\mathrm{V}_{\mathrm{CC}}=3.3 \mathrm{~V}$ and $\mathrm{T}_{\mathrm{A}}=+25^{\circ} \mathrm{C}$
- ESD Protection Tested per JESD 22
- Exceeds 200-V Machine Model (A115)
- Exceeds 2000-V Human Body Model (A114)
- Exceeds 1000-V Charged Device Model (C101)
- Latch-Up Exceeds 250 mA per JESD 78, Class I
- All devices are:
- Totally Lead-Free \& Fully RoHS compliant (Notes 1 \& 2)
- Halogen and Antimony Free. "Green" Device (Note 3)

## Applications

- General Purpose Logic
- Bus Driving
- Power Down Signal Isolation
- Wide array of products such as:
- PCs, Notebooks, Netbooks, Ultrabooks
- Networking Computer Peripherals, Hard Drives, CD/DVD ROM
- TV, DVD, DVR, Set Top Box

Notes: 6. Stresses beyond the absolute maximum may result in immediate failure or reduced reliability. These are stress values and device operation should be within recommend values.
7. Forcing the maximum allowed voltage could cause a condition exceeding the maximum current or conversely forcing the maximum current could cause a condition exceeding the maximum voltage. The ratings of both current and voltage must be maintained within the controlled range.

## LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:
A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.
B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
